

Can You Scan And Email Me Copies Of My Apostille Certificates Before You Mail Them Back To Me

Sorry, we cannot.

The reason for this is our employees go directly from the steps of the Texas Secretary of State with your hot off the presses apostille certificates right to a FedEx, UPS or DHL accepting office. To make the razor-thin shipping cutoff times since COVID and to make sure no errors happen we will not do scans.

But we always take a photo of your apostille certificates and email you the photos to let you know when your apostille order has been completed.
